PROJECTS

WasteNot – Full Stack Developer | UW Bootcamp
> This kitchen tracking application allows users to maintain inventory on their custom kitchen(s) and get recipe inspiration to avoid food waste. It also helps connect users with local food banks.
> Tools utilized: React, Express, Sequelize, JWT and multiple third-party APIs.
> **GitHub:** https://github.com/rachlally/feast-front-end
> **Deployed:** https://wastenotkitchentracker.netlify.app/

E-vents – Full Stack Developer | Project Manager | UW Bootcamp
> Allows users to create/edit events, invite friends, upload custom images and set private/public events.
> Tools utilized: Express, Handlebars, Calender.io, Cloudinary MySQL and Node.js.
> **GitHub:** https://github.com/24rgraham/event-planner-project
> **Deployed:** https://event-planner-bnnr.herokuapp.com/

Zoo Animal Game – Front End Developer | Project Manager | UW Bootcamp
> Users have the ability to guess the correct animal based on clues. Upon guessing correctly or giving up, the user is given five YouTube videos to learn more about the animal.
> Tools utilized: Zoo Animal API, YouTube API, Bulma and RPGUI CSS frameworks.
> **GitHub:** https://github.com/FelishaYuMacias/Zoo-Animal-Game
> **Deployed:** https://felishayumacias.github.io/Zoo-Animal-Game/
> - **Staff-selected UI/UX award**
> - **Peer-selected People's Choice Award**

EXPERIENCE

The Humane Society of the United States (HSUS) | Remote   **Winter 2021 – Summer 2022**
Food Service Innovation Coordinator

Worked with food service companies, universities, K-12s and hospitals to increase plant-based options offered on menus across the country.

- Conducted extensive research on unfamiliar topics to gain in-depth understanding and remain informed of problem areas in order to create efficient and effective solutions
- Worked with the top 50 U.S. foodservice management companies to set plant-forward goals and tailored messaging to meet the needs of specific institutions, executives and audiences
- Drafted and edited written materials such as press releases (in conjunction with our team), monthly newsletters (independently) and more to publicize partnerships while maintaining confidentiality when needed
- Led on-site and virtual professional development trainings and workshops to educate about the benefits of plant-based foods and evaluate menus to implement changes at U.S. institutions
- Coordinated between multiple teams and projects simultaneously to maintain collaborations and messaging
- Creating and distributing resources to streamline our work and educate corporate executives
- Use of Sharepoint, Excel, Airtable, Uplead and Microsoft and Google Suite to remain organized between thousands of contacts, projects and events
- Regularly collaborated between departments and with other NGOs and stakeholders through coalitions

EDUCATION

University of Washington – Full Stack Coding Bootcamp Certificate   **Fall 2022**
